# Headlight Restoration Kit

Instruction Sheet

DL6135

Detail Product

## KIT CONTENTS:

Quantity	Description
1	1oz Lens Prep (enough for two headlights)
1	1oz Lens Coating (enough for two headlights)
2	Non-abrasive Lotion Pads (one for each headlight)
1	Lint Free Towel
2	Alcohol Pads
2	Disposable Nitrile Gloves

## YOU SUPPLY\*:

- Safety glasses\* & microfibers\*

## DIRECTIONS:

### NOTES:

For polycarbonate or plastic headlight only! Not intended for glass headlight. Please wear proper protective equipment. Do not use in direct sunlight or a windy area; ensure work area is free of dust prior to application. Protect paint and trim areas from exposure to overspray of Lens Coating. Wipe painted areas immediately after treating.

**Do not allow Lens Coating to dry on painted surfaces, remove immediately while wet.**

### STEP 1: Clean the Lens

Wash lens with soap and water. Dry the lens with a clean wax/silicone free towel.

### STEP 2: Prepare the Lens

Shake Lens Prep well before use. Apply a quarter size amount of lotion to one of the non-abrasive lotion pads. Rub the pad with the lotion into the lens using a side to side motion with moderate pressure. For light to moderate damage, 2-4 minutes, for heavy damage, 4-6 minutes or as needed. Repeat rubbing and wiping as needed.

### STEP 3: Preparing Lens for Coating

Wipe each lens with the alcohol wipe, then dry with the lint free towel. The headlight must be completely dry and clean of all residual created by Step 2. This is a crucial step to ensure the proper bonding of the Lens Coating.

### STEP 4: Applying Lens Coating

Ensure STEP 3 was followed correctly. Spray the lens generously, starting at the top of the lens (one coat). Without touching the lens itself, wipe the area surrounding the lens with a clean, dry towel. Based on temperature and humidity, allow to dry 15-30 minutes.

### STEP 5: Finishing

Do not touch treated lens. With a water wet microfiber, wipe all of the areas that the Lens Coating has come into contact with. Do not move the vehicle until the coating is dry (15-30 minutes). Do not run through an automatic car wash for 24 hours.

**\*Please properly discard of all materials after use.\***

Enjoy your newly restored headlights brought to you by Mighty Auto Parts®.

## SMALL BOTTLE INSTRUCTIONS

### LENS PREP

**DANGER: May cause genetic defects. May cause cancer.**

**DIRECTIONS:** Carefully read all instructions on the instruction sheet (inside the box) before use. Use only as directed. Designed for use on headlights in polycarbonate or plastic only!
